

Ahmad KRD

Sr. Full Stack Developer

ahmadabbas.krd@gmail.com | India | +91 8160721519

Profile

Full Stack Developer with 4+ years of experience building scalable SaaS products and enterprise applications using **PHP, Laravel, Node.js, Express.js, React.js, Next.js, MySQL, MongoDB, and cloud technologies**. Experienced in designing RESTful APIs, database architecture, authentication systems, payment gateway integrations, cloud deployment, and performance optimization. Strong background in backend development, system architecture, DevOps, and delivering end-to-end software solutions.

Skills

Languages:

C, PHP, JavaScript, Html/Css

DevOps & Tools:

Git, WHMCS, Virtuozzo, DigitalOcean, Cloud Config

Frontend:

React.js, Tailwind CSS, AngularJS, React Native, HTML/CSS, Bootstrap

Soft Skills:

Team Leadership, Client Communication, R&D, Documentation

Backend:

Node.js, Express.js, Laravel, Next.js, MySQL, MongoDB, Supabase, REST API, MVC architecture

Professional Experience

Sr. Full-Stack Engineer (Product & Platform Development), Qubixcode- 05/2025 – Present - Ahmedabad

- Developed and maintained scalable SaaS products using **Node.js, Next.js, React.js, TypeScript, and MongoDB**, following modern full-stack architecture and best practices.
- Designed and implemented secure **RESTful APIs, authentication systems, role-based access control (RBAC), and backend business logic** for production applications
- Managed complete application deployment and infrastructure using **Linux, VPS, Nginx, PM2, SSL, cloud services, monitoring, and performance optimization**.
- Integrated **OpenAI APIs and AI-powered features** to automate workflows, generate intelligent content, and enhance product capabilities.
- Improved organic visibility through **technical SEO, Google Search Console, structured data, sitemap management, and metadata optimization**.
- Delivered end-to-end product development independently, covering **system architecture, frontend development, backend development, deployment, maintenance, and client communication**.

Software Engineer, STP Web Hosting- 02/2024 – 04/2025 - Ahmedabad

- Developed and maintained an AI-powered Chrome extension for Chatra using **Vanilla JavaScript, Python, Tailwind CSS, and OpenAI APIs**, enhancing real-time customer engagement and automated support responses.
- Created technical documentation and deployment guides for **Node.js, React, Angular, Java, PHP, and cloud-hosted applications** on AccuWeb.cloud, helping streamline customer onboarding and infrastructure setup.
- Worked extensively with **WHMCS, Laravel, Core PHP, MySQL, and Virtuozzo** to build and maintain automated virtual server provisioning, billing systems, account management, and support platform integrations.
- Developed and optimized backend modules using **PHP and Laravel MVC architecture**, ensuring scalable, maintainable, and secure application workflows.

- Integrated **RESTful APIs, third-party services, and automation workflows** to improve operational efficiency and reduce manual administrative tasks.
- Contributed to insurance and real-estate lead management platforms using **Node.js, React, PHP, MySQL, and Tailwind CSS**, delivering responsive and scalable web applications.
- Performed **database design, query optimization, bug fixing, and performance tuning** to improve application reliability, security, and user experience.

Full Stack Developer, Alteza tel- 9/2022 – 01/2024 - Ahmedabad

- Redesigned the company's E-commerce platform using **PHP, Angular, MySQL, and MVC architecture**, resulting in a **70–80% increase in customer retention** and an improved checkout experience.
- Developed a custom **Rating & Review module** using **Angular** on the frontend and **Laravel RESTful APIs** on the backend, improving customer engagement and product feedback management.
- Optimized **PHP/Laravel application performance**, refactored legacy code, and resolved critical bugs affecting responsiveness, scalability, and security.
- Led a team of 3–4 developers and coordinated directly with clients to gather requirements, plan deliverables, and ensure timely project execution.
- Built an end-to-end **POS (Point of Sale) and Inventory Management System** using **Laravel, PHP, MySQL, and REST APIs**, handling user dashboards, billing, inventory tracking, and analytics.
- Designed and implemented **RESTful PHP APIs** using **Laravel MVC architecture**, ensuring modularity, maintainability, clean code practices, and seamless frontend-backend integration.
- Managed backend operations independently, including **database management, API maintenance, feature enhancements, bug fixes, and client communication** for ongoing support and upgrades.

Projects

Scanzen – AI-powered SaaS Platform: Micro-SaaS Product

Next.js, Node.js, MongoDB, Redis, OpenAI API, Nginx, Cloudflare | Live: <https://scanzen.app>

- Built a **production-ready SaaS platform** for AI-driven product intelligence and data analysis
- Designed **scalable REST APIs** handling high-volume requests with optimized MongoDB queries
- Implemented **SSR, caching, and performance optimizations** in Next.js for faster page loads
- Integrated AI pipelines for automated insights, summaries, and intelligent content extraction
- Deployed on VPS using **Nginx + PM2**, with **Cloudflare CDN and caching** for global performance

Photofy – AI-based Image Processing SaaS: Micro-SaaS Product

Next.js, Node.js, MongoDB, Cloudinary, AI APIs | Live: <https://photofy.app>

- Developed a **full-stack SaaS application** for AI-powered image enhancement and processing
- Built **API-driven backend services** for image upload, transformation, and optimization

- Implemented secure authentication and scalable usage-based architecture
- Optimized media delivery using **CDN, lazy loading, and caching strategies**
- Designed backend services to support **concurrent users and large media workloads**

AI Auto-Suggestion Browser Extension

JavaScript, Python, ChatGPT (Fine-tuned)

- Developed a browser extension integrating AI-powered auto-suggestions for internal office applications.
- Fine-tuned GPT models to provide contextual recommendations, reducing manual work by **5–6 business hours per employee**.
- Automated repetitive workflows improve productivity across multiple teams.

Alteza Tele-Pharmacy Platform

React, Node.js, MongoDB

- Redesigned and enhanced a tele-pharmacy platform (similar to 1mg/PharmEasy) with improved UI/UX and additional features.
- Implemented MongoDB-based product catalogue and order management systems.
- Increased platform sales by **20%** through optimized user experience and streamlined checkout.

Cuvva Insurance Platform

Svelte, React, Node.js, MongoDB

- Contributed to a short-term insurance platform by developing scalable customer and admin dashboards.
- Designed MongoDB schemas for insurance policies, users, and claims management.
- Implemented role-based access control and policy tracking to improve admin efficiency.

Restaurant Billing System (POS)

React, Laravel API, MySQL

- Designed and optimized a relational database schema for a POS billing system covering orders, inventory, and user management.
- Improved query performance by **~20%** using indexing and query optimization for ~10k users.
- Built secure APIs with transactional support to ensure data consistency.

Fillora – One-Form Platform: Micro-SaaS Product

Next.js / React, Node.js | Live URL:- <https://fillora.app/>

- Built **Fillora**, a one-form solution enabling businesses to collect, manage, and analyze form submissions efficiently.
- Designed dynamic form handling with validation and optimized data storage.
- Focused on performance, usability, and scalability for real-world business use cases.

TryFitNow.app – Fitness Platform: Micro-SaaS Product

React / Next.js, Node.js | Live URL:- <https://tryfitnow.app/>

- Developed a fitness-focused web application offering user engagement through personalized features.
- Implemented responsive UI and optimized performance for mobile and desktop users.
- Enhanced user experience through clean design and smooth navigation.

Cardlyx – Digital Card Platform: Micro-SaaS Product

React / Next.js, Node.js | Live URL:- <https://cardlyx.com/>

- Built **Cardlyx**, a digital card solution for creating and managing smart business or greeting cards.
- Implemented secure data handling and dynamic card generation.
- Designed a modern, intuitive interface to improve user adoption and engagement

iStudy12 – Online Learning Platform

RPHP, MySQL, JavaScript, Bootstrap | Live URL:- <https://dev.istudy12.com/>

- Developed an online learning platform with course management, student authentication, and content delivery features.
- Built backend functionality using **PHP and MySQL** and optimized database performance for scalability.
- Created responsive user interfaces to enhance accessibility and user experience across devices.

Education

MCA – Master of Computer Applications, *Silver Oak University*- 2022 - 2024

BCA – Bachelor of Computer & Application, *IT Sheliya (HNGU University)* - 2021
